

Snehal Dayanand Ugale

Infrastructure Engineer

London, United Kingdom | +44 7438 504190 | snehalugale02@gmail.com

Right to work in UK (Graduate Route visa from September 2026) · Available full-time immediately

PERSONAL STATEMENT

Infrastructure Engineer with 4+ years of enterprise experience operating and supporting mission-critical virtualization and VDI platforms, including Citrix Cloud, MCS/PVS, XenApp/XenDesktop, and Cloud Virtual Desktop provisioning, alongside VMware vSphere and Microsoft Hyper-V administration (VM lifecycle, patching, resource optimisation). Led on-premises to Azure cloud migrations with minimal downtime, and brings hands-on Windows Server administration, Active Directory and FSLogix management, and infrastructure-level vulnerability remediation (Qualys). Automates operational tasks using Python, and has applied hands-on Terraform and GitHub Actions CI/CD skills in an MSc dissertation project building an ML-based infrastructure misconfiguration scanner. Experienced in incident response, high-priority escalations, and infrastructure health monitoring via ServiceNow and Power BI, with a strong track record of authoring SOPs and runbooks that support reliable, well-governed, operationally mature platforms. Comfortable collaborating with infrastructure, security, and application teams to drive platform reliability through patching, proactive monitoring, and continuous service improvement.

CORE COMPETENCIES

- | | |
|---|---|
| • VDI Infrastructure (Citrix, XenApp/XenDesktop) | • Windows Server Administration & Patching |
| • Virtualization Operations (VMware vSphere, Hyper-V) | • PowerShell & Python Automation |
| • ITIL Incident & Change Management (CAB/TAB) | • Infrastructure Health Monitoring (ServiceNow, Power BI) |
| • Business Continuity - Minimal-Downtime Migrations | • Vulnerability Management (Qualys) |
| • Active Directory & FSLogix Administration | • Network Administration (Firewalls, VPNs) |
| • SOPs, Runbooks & Documentation | • End-User Troubleshooting & Support |

PROFESSIONAL EXPERIENCE

Accenture Solutions Pvt Ltd - Pune, India

January 2021 – August 2025

Cloud Infrastructure Managed Senior Analyst

- Administered Citrix Cloud on Azure, including MCS and PVS technologies for desktop provisioning, and App-V package creation, delivered technical support for XenApp & XenDesktop environments (5.6, 6.5, 7.x) and Citrix Cloud DaaS Premium, operating mission-critical VDI infrastructure for enterprise end users.
- Administered VMware and Microsoft Hyper-V environments, performing VM creation, disk swapping, monthly patching, deployment, troubleshooting, and resource optimisation to maintain platform reliability and performance.
- Managed Azure and AWS cloud infrastructure, including Cloud Virtual Desktop provisioning, snapshot and AMI creation, monthly patching activities, policy management, license management, and EC2 instance management, while also delivering end-user IT support in a business environment.
- Led on-premises to Azure cloud migrations, ensuring smooth transitions with minimal downtime and business continuity.
- Monitored infrastructure health and resolved incidents efficiently, including high-priority escalations, supporting operational reliability across enterprise platforms.
- Troubleshot end-user infrastructure issues and managed incidents end-to-end, while actively participating in Change Advisory Board (CAB) and Technical Advisory Board (TAB) calls to review and manage change requests in line with ITIL change management practices.
- Automated infrastructure tasks using Python, improving operational efficiency and reducing manual overhead.
- Created and maintained dashboards for tracking SLAs across Incidents, Change Requests, Vulnerabilities, infrastructure health, and operational performance using ServiceNow and Power BI.
- Conducted infrastructure-level vulnerability assessments and remediation using Qualys scans, ensuring compliance with security standards.
- Managed user profiles via FSLogix and Active Directory, handling access permissions, credential resets, and onboarding.

- Configured and troubleshoot network devices (firewalls, routers, switches, VPNs) to maintain secure and reliable connectivity.
- Authored SOPs, runbooks, and knowledge base articles to streamline operations.

EDUCATION

MSc Cloud Computing - University of East London

Sept 2025 – Sept 2026

Modules: Cloud Computing · Artificial Intelligence · Network Security · Data Engineering

Bachelor of Engineering - Savitribai Phule Pune University

June 2016 – June 2020

CGPA: 8.0 / 10

KEY PROJECT

AI-Driven Terraform Misconfiguration Scanner - MSc Dissertation

2025 – 2026

University of East London

- Trained and compared Logistic Regression, Random Forest, and XGBoost classifiers on 480 real-world Terraform files spanning 6 AWS resource types to detect misconfigurations from TF-IDF text features; XGBoost achieved 95.65% accuracy and a 0.94 F1-score, outperforming a rule-based baseline (confirmed via 5-fold cross-validation, mean 95.43%).
- Built a second classifier assigning graded LOW/MEDIUM/HIGH severity scores (94.57% accuracy), and packaged both models into a working scanner deployed inside a GitHub Actions CI/CD pipeline.
- Integrated the scanner to automatically scan pull requests touching Terraform files and block merges on detected HIGH-severity issues; validated against a real pull request containing a deliberately introduced misconfiguration.
- Tools: Python, scikit-learn, XGBoost, Terraform, GitHub Actions, AWS.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Security, Compliance & Identity Fundamentals (SC-900)
- AWS Academy Graduate — Cloud Foundations, Amazon Web Services (AWS), issued March 2026 ([view credential](#))

AWARDS & RECOGNITION

- Best Operations Support & Growth Catalyst - Accenture FY2024 Q3
- Skills Star Award - Accenture FY2024 Q2
- Awarded the 2025 ISACA London Chapter IT Audit Scholarship Programme

TECHNICAL SKILLS

Virtualization & VDI: Citrix Cloud, MCS/PVS, XenApp/XenDesktop (5.6–7.x), App-V package creation, Citrix Cloud DaaS Premium, VMware vSphere (VM creation, VDisks, snapshots, patching), Microsoft Hyper-V administration (deployment, troubleshooting, optimisation)

Windows & IT Support: Windows Server administration & patching, Windows 10/11, macOS, hardware/software troubleshooting, Microsoft 365 (Teams, OneDrive, Exchange, mailbox management), Active Directory (account creation, group management, password resets), FSLogix profile management

Automation & Scripting: Python, Infrastructure as Code (IaC) principles, Terraform, GitHub Actions CI/CD pipelines, scikit-learn/XGBoost (applied in MSc dissertation project) — developing PowerShell

Monitoring, Incident & Reporting: ServiceNow, Power BI dashboards, incident tracking, high-priority escalation handling, SLA compliance, infrastructure health reports, storage alert creation

ITIL & Service Management: Incident Management, Change Management (CAB/TAB participation), Problem Management, monthly OS and infrastructure patching cycles

Cloud Infrastructure: AWS (EC2, S3, VPC, IAM, Lambda, Auto Scaling, AMI creation, instance/storage management), Azure (VMs, Storage, Snapshots, Service Management, Citrix Cloud), Azure cloud migration

Networking & Security: LAN/WAN support, VPNs, firewalls, routing, switches, connectivity troubleshooting, infrastructure-level vulnerability management (Qualys)

Collaboration & Remote Tools: Microsoft Teams, Zoom, Outlook

OS: Windows 10/11, Windows Server, macOS
