Snehal Dayanand Ugale

Infrastructure Engineer
London, United Kingdom | +44 7438 504190 | snehalugale02@gmail.com | sugale1218.github.io
Right to work in UK · Available full-time immediately

PERSONAL STATEMENT

Infrastructure Engineer with 5 years keeping enterprise virtualization and VDI platforms Citrix Cloud, VMware vSphere, Microsoft Hyper-V running reliably, alongside Azure and AWS cloud infrastructure, vulnerability remediation (Qualys), and storage/policy management. Led on-premises to Azure migrations with zero downtime and provided on-call support for high-priority incidents. Most recently, turned an MSc dissertation into working infrastructure tooling: an ML-based Terraform misconfiguration scanner (95.65% accuracy) deployed as a live GitHub Actions CI/CD check. Now seeking infrastructure and cloud engineering roles across the UK.

CORE COMPETENCIES

- VDI Infrastructure (Citrix, XenApp/XenDesktop)
- Virtualization Operations (VMware vSphere, Hyper-V)
- ITIL Incident & Change Management (CAB/TAB)
- Business Continuity - Minimal-Downtime Migrations
- Active Directory & FSLogix Administration
- SOPs, Runbooks & Documentation
- Windows Server Administration & Patching
- PowerShell & Python Automation
- Infrastructure Health Monitoring (ServiceNow, Power BI)
- Vulnerability Management (Qualys)
- Network Administration (Firewalls, VPNs)
- End-User Troubleshooting & Support

PROFESSIONAL EXPERIENCE

Accenture Solutions Pvt Ltd - India *January 2021 – August 2025*
Cloud Infrastructure Managed Senior Analyst

- Administered Citrix Cloud on Azure (MCS/PVS, App-V) and XenApp/XenDesktop environments, operating mission-critical VDI infrastructure for enterprise end users.
- Administered VMware and Microsoft Hyper-V environments VM creation, patching, troubleshooting, resource optimisation, and storage management.
- Managed Azure and AWS cloud infrastructure, including Cloud Virtual Desktop provisioning, EC2 instance management, and policy management, and led on-premises to Azure cloud migrations with minimal downtime.
- Provided on-call support for high-priority incidents and participated in CAB/TAB change management in line with ITIL practices.
- Automated VM/desktop provisioning and other infrastructure tasks using Python; built ServiceNow/Power BI dashboards for SLA and incident tracking.
- Managed vulnerability remediation across an estate of approximately 2,000 Citrix Virtual Desktops and 200 XenServer-hosted application servers using Qualys, running scans, segregating reports by severity, and coordinating monthly patching to maintain compliance.
- Authored SOPs, runbooks, and knowledge base (KB) articles on recurring issues, supporting consistent knowledge management.

EDUCATION

MSc Cloud Computing - University of East London *Sept 2025 – Sept 2026*
Modules: Cloud Computing · Artificial Intelligence · Network Security · Data Engineering

Bachelor of Engineering - Savitribai Phule Pune University *June 2016 – June 2020*
CGPA: 8.0 / 10

KEY PROJECT

AI-Driven Terraform Misconfiguration Scanner - MSc Dissertation *2025 – 2026*
University of East London

- Trained and compared Logistic Regression, Random Forest, and XGBoost classifiers on 480 real-world Terraform files spanning 6 AWS resource types to detect misconfigurations from TF-IDF text features; XGBoost achieved

95.65% accuracy and a 0.94 F1-score, outperforming a rule-based baseline (confirmed via 5-fold cross-validation, mean 95.43%).
- Built a second classifier assigning graded LOW/MEDIUM/HIGH severity scores (94.57% accuracy), and packaged both models into a working scanner deployed inside a GitHub Actions CI/CD pipeline.
- Integrated the scanner to automatically scan pull requests touching Terraform files and block merges on detected HIGH-severity issues; validated against a real pull request containing a deliberately introduced misconfiguration.
- Tools: Python, scikit-learn, XGBoost, Terraform, GitHub Actions, AWS.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Security, Compliance & Identity Fundamentals (SC-900)
- AWS Academy Graduate — Cloud Foundations, Amazon Web Services (AWS), issued March 2026 (view credential)

AWARDS & RECOGNITION

- Best Operations Support & Growth Catalyst - Accenture FY2024 Q3
- Skills Star Award - Accenture FY2024 Q2
- Awarded the 2025 ISACA London Chapter IT Audit Scholarship Programme

TECHNICAL SKILLS

Virtualization & VDI: Citrix Cloud, MCS/PVS, XenApp/XenDesktop (5.6–7.x), App-V package creation, Citrix Cloud DaaS Premium, VMware vSphere (VM creation, VDisks, snapshots, patching), Microsoft Hyper-V administration (deployment, troubleshooting, optimisation)

Windows & IT Support: Windows Server administration & patching, Windows 10/11, macOS, hardware/software troubleshooting, Microsoft 365 (Teams, OneDrive, Exchange, mailbox management), Active Directory (account creation, group management, password resets), FSLogix profile management

Automation & Scripting: Python, Infrastructure as Code (IaC) principles, Terraform, GitHub Actions CI/CD pipelines, scikit-learn/XGBoost (applied in MSc dissertation project) — developing PowerShell

Monitoring, Incident & Reporting: ServiceNow, Power BI dashboards, incident tracking, high-priority escalation handling, SLA compliance, infrastructure health reports, storage alert creation

ITIL & Service Management: Incident Management, Change Management (CAB/TAB participation), Problem Management, monthly OS and infrastructure patching cycles

Cloud Infrastructure: AWS (EC2, S3, VPC, IAM, Lambda, Auto Scaling, AMI creation, instance/storage management), Azure (VMs, Storage, Snapshots, Service Management, Citrix Cloud), Azure cloud migration

Networking & Security: LAN/WAN support, VPNs, firewalls, routing, switches, connectivity troubleshooting, infrastructure-level vulnerability management (Qualys)

Collaboration & Remote Tools: Microsoft Teams, Zoom, Outlook

OS: Windows 10/11, Windows Server, macOS
